HJ Weir Engineering to open USA Sales and Distribution offices.

CHEPSTOW, Wales, United Kingdom

HJ Weir Engineering Co. Ltd. has announced that it has opened a US subsidiary, HJ WEIR USA Inc. Based in Virginia the new company will bring the full range of HJ Weir flatwork handling technology to the US market.

“HJ Weir products have been sold in the USA since the 1960s through manufacturing licensees and distributors. HJ Weir USA will serve to expand upon our sales and marketing efforts in North America,” says Rob Weir, Managing Director.

HJ Weir USA will be headed by Jason P. Gerling, a long time HJ Weir distributor. Gerling previously served as Sales Director for a China-based distributor of HJ Weir products. “During Jason’s five years as a distributor in China, we were able to become the market leader in China for flatwork handling related technology,” says Ross Weir, Director.

“HJ Weir is focused on offering the most innovative and highest quality flatwork handling technology available in the industry. We will continue to focus on offering our high quality products and full technical support to our valued customers in this part of the world,” says Gerling.

HJ Weir will be exhibiting its full range of flatwork handling technology at the Clean Show in Las Vegas this June.
