FLATWORK HANDLING TECHNOLOGY

The Vacfeed 37 general purpose feeder has been specifically designed to aid the feeding of small to large items of flatwork. As the overall depth of machine is less than 1200mm (48 inches), it is ideally suited for any laundry.

# Vacfeed 37GP Feeder

## Machine Design Features:

- Compact; free standing modern frame with built-in wheels and jacking bolts.
- Less than 1.2 metres (48") front to back.
- Conveyor nose height adjustable to match ironer feed bands.
- Easy clean, low-level filter and cleaning system that is fully accessible from the front of the machine.
- Suction chamber designed to maximise fan efficiency and eliminate the need for cumbersome ducting.
- High efficiency fans providing 200 cubic metres (7063 cubic feet) of air per minute.
- Low noise level – less than 75DB.
- Electronically controlled variable speed drive to feed conveyor.
- Space under front of machine for work trolley or bins.
- Easy access transparent doors in ducting system for removal of articles accidentally drawn in.
- Mesh screening to prevent article entry into fans.
- Operator friendly working height.

## Optional Extras:

- **Auto-Variable Speed Control** - Automatically adjusts Feeder speed to match any variants in ironer speed.
- **Doffer Wheels (set)** - Feeding aid for smaller articles.
- **Feeding Trough (set)** - Article collection bins for operator feeding.
- **Direct into Ironer Feeding** - Delivery Conveyor (Nose) to provide direct into Ironer chest feeding.
- **Light Bar** - Provision of operator lighting above main conveyor.
- **Special Spares Kit** - Range of dedicated spares for the Vacfeed 37GP.
- **Variable speed fans.**

## Method of Operation

The Vacfeed 37 GP is fitted with a high efficiency ventilator system, which provides an excellent vacuum and rapid agitating air stream with lower power characteristics than other similar products. The high speed input rollers together with vacuum hold on the feed bands will ensure maximum tail end agitating and smoothing even on smaller articles. Both vacuum, and feed rollers can be switched off for easy waxing of the ironer.

## Speed

Full ranges of fixed speeds between 10-50mpm (33 - 164 fpm) are available.

Bulwark Industrial Estate, Bulwark, Chepstow, Monmouthshire, NP16 5QZ, United Kingdom.
