# Operator Safety Screen

## Providing protection for laundry operatives when social distancing is not achievable

Our operator safety screen is designed and manufactured here in the UK, available for delivery within 5-7 working days.

Available in 2 to 4 metre widths, it provides side protection for up to 6 operators through its transparent moveable screens. The clear panels provide uninterrupted vision and can be quickly and efficiently cleaned between staff rotations.

Heavy duty castors make the unit mobile and easy to manoeuvre. The durable powder coated finish allows for easy cleaning. Supplied as a kit, the unit is easy to assemble and can be operational within 30 minutes.

Designed and manufactured by HJ Weir, specialists in equipment for the commercial and industrial laundry sector worldwide.
